

Isabel Williamson Lunar Observing Forms

To qualify for the Isabel Williamson Certificate all R (required observations) must be completed by entering the date and time for each observation. The C (challenge observations) are optional as well as the rest of the fields on these observing forms, such as drawings. **The IWLOP Deluxe Observing Forms must be used and submitted.**

PART 1 – Introducing the Moon

A – Lunar Phases and Orbital Motion

R 1 – Enter in the notes section the date and time for each phase observed.

R 2 – Date _____ Time _____

R 3 – Date _____ Time _____

Date _____ Time _____

Notes

B – Major Basins (Maria) & Pickering Unaided Eye Scale

R 1 – Date _____ Time _____

C 1 – Date _____ Time _____

C 2 – Date _____ Time _____

Notes

C – Ray System Extent

R 1 – Date _____ Time _____

C 1 – Date _____ Time _____

Notes

D – Crescent Moon Less Than 24 Hours From New

C 1 – Date	Age in Hours	Location
_____	_____	_____

Notes

E – Binocular & Unaided Eye Libration

R 1 – Date _____	Time _____
C 1 – Date _____	Time _____

Notes

PART 2 – MAIN OBSERVING LIST

As in part one, only the R (required observations) and the date and time they were observed need to be completed to obtain the Isabel Williamson Lunar Observing Certificate.

The numbers for ‘Seeing’ and ‘Transparency’ refer to the condition of the sky at the time the observation was made. ‘Seeing’ refers to the steadiness of the atmosphere and ‘Transparency’ to the clarity. In both cases, it is the Antoniadi Scale where 1 is best, 2 is better-than-average, 3 is average, 4 is below average, and 5 is poor.

The telescope and magnification fields provide a space to record the instrument(s) and the power used for each observation. The magnification, or power, is based on the focal length of the telescope divided by the focal length of the eyepiece used.
