Dear Jim,

In reply to your letter of February 5th, we shall be glad to run off your next bulletin. Just send along the text and let us know how many copies you need. I presume you will look after the mailing, as in the past.

As you will have seen from Skyward, observing conditions were exceptionally poor during December and January, which is why there was such a slump in our observations. It is getting a little better.

The R.A.S.B. general assembly will be in Toronto on May 17th to 20th. We hope to have a good delegation because several of the boys - George, Constantine, Kenneth - now have cars and others have access to the family car. Also, billeting in one of the college residences has been arranged for a limited number, which will be more reasonable than staying at a hotel. I am very pleased that arrangements have been made to hold all the meetings in one building, for we shall

then have a better opportunity to see the exhibits. Last year at Edmonton I had only one hurried glimpse!

I am glad that you are writing up an article for the Journal. Had you thought of a paper for the paper session at the General Assembly? That would accomplish two purposes. There is a rigid deadline for papers, though, but I don't remember what it is!

since it would later be published.

Also, the paper has to be kept down to about 10 minutes. However, slides could be used and these could be published.

Best regards

Dabe Williamson
