

411 Brixton Avenue

St. Lambert, P.Q.

August 18, 1963

Dear Mr. Matte,

I am sorry that I have not written to you sooner, but I have been very busy for the past few months.

Have you made many observations of Nova Herculis in the past few months? If so, could you please send me estimates of magnitudes for some of your observations? Also, could you send me a summary of your Comet observations?

Best regards, and good observing,

Jim Low
