

Observer - Hugh Maclean

October 29, 1965

05:30 hrs EST.

TAIL - OVER  $20^{\circ}$  IN LENGTH

E. S. E.

HORIZON

COMET IKEYA-SEMI, 1965  $\delta$  AS SEEN  
WITH NAKED EYE - THE COMA DID NOT EMERGE  
FROM LOW CLOUDS. ALSO USED 7x50 AND  
2x65 BINOCULARS, AND 4 1/4" REFLECTOR. COMET  
TAIL SEEN BEST WITH EYE ALONE. I AM WILLING TO  
CONCEDE THAT MY ARTISTIC TALENTS ARE ALMOST  
NON EXISTENT! COMET HEAD WAS IN CORVUS.

NIAGARA FALLS, ONT.
