October 17, 1966.

Dear Jim,

Enclosed are the balance of the comet & Nova Search report forms that have come in to date. David Fewtrell's September reports aren't in yet and Justin T. Long's reports, if any, have probably gone to Dot Spore. I am sending her a summary of reports for June to September inclusive, and will ask her about Mr. Long's reports. As soon as I can find a permanent replacement, I'll definitely tell her that we want ~~some~~ to have a chairman who can handle the whole job. It is getting to be too much to expect anyone to do as an extra chore.

Incidentally, David Levy's reports are getting a little involved. Regarding telescopic comet hunt observations, I just didn't attempt to copy his reports but simply noted the dates on which he observed and the total hours for each month.

Sincerely

Dave Welbourn
