## INTERESTED IN ASTRONOMY?

## JOIN THE CLUB!

## *Who we are...*

The Royal Astronomical Society of Canada Charlottetown Centre is a group of amateur astronomers who have been together for more than seventeen years. We meet regularly to share our enjoyment of exploring the night sky.

## *Where we meet...*

Our meetings are held in the lecture theater of the K.C. Irving Chemistry Centre on the UPEI campus. We meet at 7:00 PM, the third Sunday of every month.

## *Our meetings...*

Monthly meetings are meant to be interesting, informative and fun. Our members have a wide variety of astronomical knowledge and experience.

They are pleased to share this through presentations to the group, and through individual discussions.

Visitors and newcomers are always welcome!

## *Our executive...*

The business of the society is conducted at administrative meetings by an elected executive. Such meetings are called at the discretion of the society's president.

## *Our activities...*

The society presents activities for our members and for the general public.

\* If weather permits, we hold a viewing night every month. Members who own telescopes share them freely.

\* We present International Astronomy Day events each April.

\* We host a public presentation and viewing night each summer at Greenwich National Park. Throughout the year we co-host viewing nights with UPEI at the university telescope.

\* We offer public presentations by eminent guest speakers.

\* We promote the wise use of outdoor lighting to preserve the beauty of dark skies for all.
